Eva Grayzel, a non-smoker, was diagnosed with late-stage oral cancer at age 33 and given a 15% chance of survival. An active champion for early detection, she founded six-step screening.

Oral cancer kills one American every hour of every day

Are you getting a …

Symptoms of oral cancer:
• persistent mouth sore
• pain in mouth or ear
• chronic hoarseness
• non-tender lump in neck
• abnormal swallowing
• peculiar sore throat

Early-stage oral cancer is often painless and goes undetected
